Let's make it easy for teachers to teach

Teachers and students can now access all their classroom resources in one place. **Simplify teaching today.**

readcloud

What is ReadCloud?

ReadCloud enables educators and students to access all their classroom resources in one place.

All content including digital textbooks, interactive resources and teacher curated content is synchronised to school timetables and sorted into virtual classrooms known as Class Clouds.
Content

Access all your eBooks and digital resources in a single set of cross-platform native apps, so you can focus on what matters most

Interactivity

Enhance learning through collaboration and the ability to share comments and Enhanced Annotations.

Personalisation

Curate, upload and share additional content with your students and classes in just a few clicks.

readcloud.com

Single Sign-On

Students and educators can access their eBooks and digital resources on up to six devices, across a range of platforms, all with a single login from their existing school credentials.

Easy integrations

Integrate ReadCloud with your Learning Management System, timetable and collaboration tools to streamline access to resources and embed links to speific resources directly within your lesson plans.

Training and support

Access local support and PD via our in-servicing program, helping to simplify onboarding, provisioning and access while you focus on what matters most.

FAQs

Which apps do you support?

ReadCloud has native applications for iOS, Android, Windows and MacOS, as well as a web app with all the functionality found in our native apps.

Do you activate publisher content?

We will audit, migrate and activate any existing codes, both standalone digital and those in print textbooks, as well as quote and provision any additional content you might need.

Can you provide print textbooks?

Yes, ReadCloud works with schools to establish a blended model of resources. Using our partnerships with world-class publishers, we can organise both digital resources, allocated into your Class Clouds, and print textbooks complete with covering and binding, delivered to your school.

Are student data and access secure?

All your data is stored locally, on Australian servers, and student data can be obfuscated for privacy purposes. You'll never need to worry about copyright or data security again, as content access is protected by ReadCloud's proprietary encryption technology with world-class secure Digital Rights Management (DRM).
