contact@readcloud.com

Technology that works with your school.

Educators and students access all their classroom resources, synchronised to school timetables and sorted into virtual classrooms.

Streamlined teaching

With all your eBooks and digital resources in a single set of cross-platform native apps, you can focus on what matters most

Interactive and dynamic

Software that enhances learning through collaboration and the ability to share comments and annotations

Personalised learning

Curate and upload additional content and share with students and classes in just a few clicks, for student-centric learning

Single Sign-On

Students and educators can access all their eBooks and digital resources on up to six devices, across a range of platforms, all with one single login from their existing school credentials.

Easy integration

Integrate ReadCloud with your Learning Management System (LMS) to streamline access to resources and embed links to specific resources and locations directly within your lesson plans and modules.

Training and support

Access local support and professional development via our in-servicing program, helping to simplify onboarding, provisioning and access while you focus on what matters most.

FAQs

Which apps do you support?

ReadCloud has native applications for iOS, Android, Windows and MacOS, as well as a web app with all the functionality found in our native apps.

Do you activate publisher content for us?

We will audit, migrate and activate any existing codes, both standalone digital and those in print textbooks, as well as quote and provision any additional content you might need.

Can you provide print textbooks as well?

Yes, ReadCloud works with schools to establish a blended model of resources. Using our partnerships with world-class publishers, we can organise both digital resources, allocated into your Class Clouds, and print textbooks complete with covering and binding, delivered to your school.

Are student data and content access secure?

All your data is stored locally, on Australian servers, and student data can be obfuscated for privacy purposes. You'll never need to worry about copyright or data security again, as content access is protected by ReadCloud's proprietary encryption technology with world-class secure Digital Rights Management (DRM).
