Overview

ReadCloud offers schools (teachers and students) the ability to access their in-classroom resources digitally from inside its proprietary set of native apps.

Digital resources can be in the form of a PDF, ePUB or fully interactive publisher digital content.

ReadCloud creates virtual classrooms otherwise known as "Class Clouds". Class Clouds are used to store the digital content used in a physical class. Teachers and students of a physical class are assigned as members to the corresponding Class Cloud.

ReadCloud's advanced eReader allows you to comment directly inside each eBook, collaborating with your fellow classmates and teachers using either text or video.

Teachers can upload their own notes or resources to further contextualise the learning experience.

ReadCloud works cross-platform including Mac, iPad, iPhone, PC, Android and Chromebook, via our web app and can be accessed on up to six devices at once.

ReadCloud supports offline reading - downloaded PDFs/ePubs are stored locally enabling access when not online.

Using This Guide

This guide is designed to help you understand ReadCloud, its many features and functions; enabling you to have an enjoyable learning experience. It will also help to troubleshoot common problems and answer common questions.

It is best to understand everything the software can do before the school year starts.

Please download the latest app from either www.readcloud.com or from the various app stores.

If you have any further questions about the software, please head to the ReadCloud Support page at help.readcloud.com.

Downloading the App

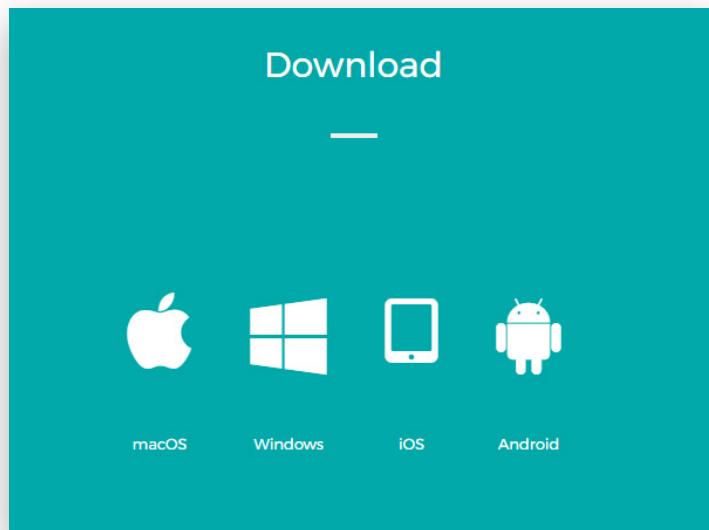

The first step is to download the ReadCloud app to your device.

Head to the 'Download' page on the ReadCloud website which can be accessed via this link:

readcloud.com/#download

Simply select the icon of the device you're using, which will take you to the appropriate app store.

Download and install the ReadCloud app from the store onto your device.

Opening the app will then take you to the log in screen.

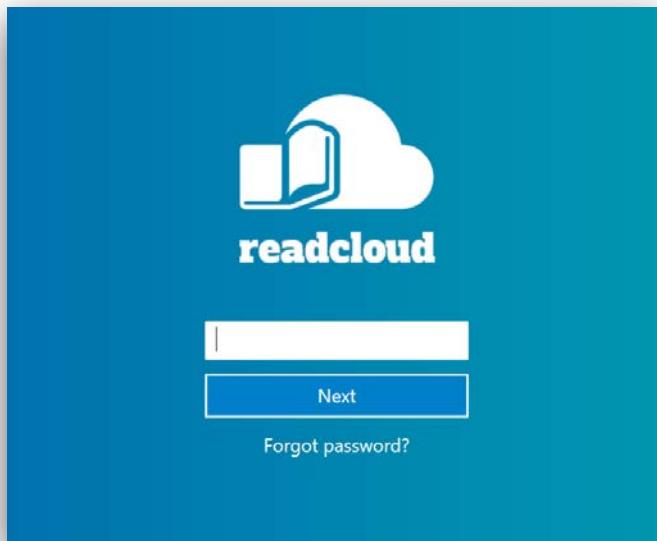

Home Screen

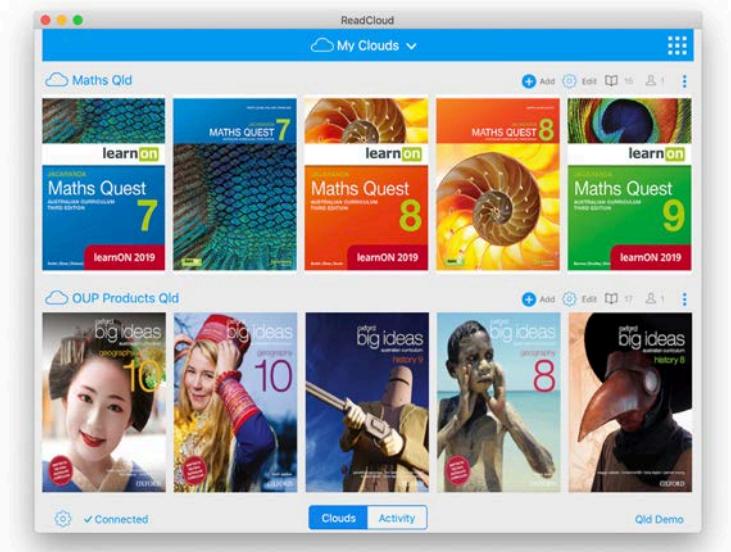

Once the application is installed on your device, the login screen is opened.

Enter your ReadCloud log in, which is your school email address. Then you can either enter your school's ReadCloud password, which your teacher will give you.

Please note usernames and passwords are case sensitive.

Once logged in you will be taken to your bookshelf.

Single Sign-On

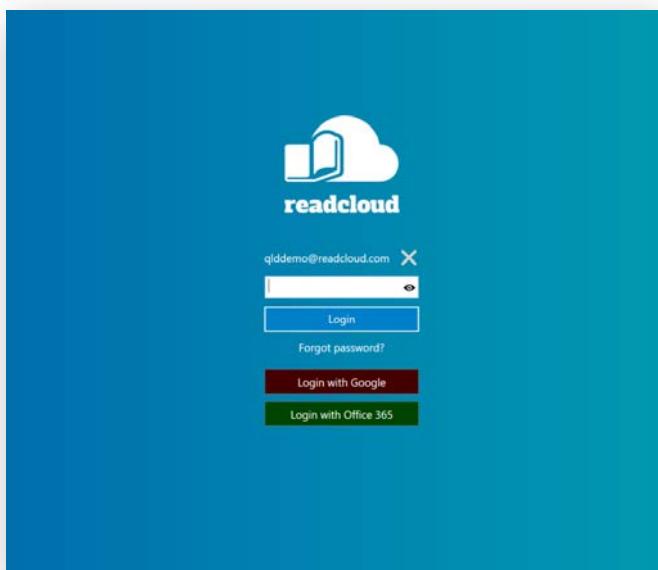

You can also log in with your school credentials - be it either Google or Office 365, meaning you no longer need to remember the ReadCloud password.

Enter your school email address then select Login with Google or Office 365.

In the dialogue box that appears, your school network username will be pre-populated and you will be prompted to enter your Google or Office 365 school network password - the same password you log in to everything at school.

Agree to the terms and conditions and select 'sign in'

As long as you don't log out, you will always be logged in, unless you are required to update your school password which you may have to do from time to time.

Application Settings

The settings icon is located in the bottom left hand corner of the app.

Click on it to access the following:

About

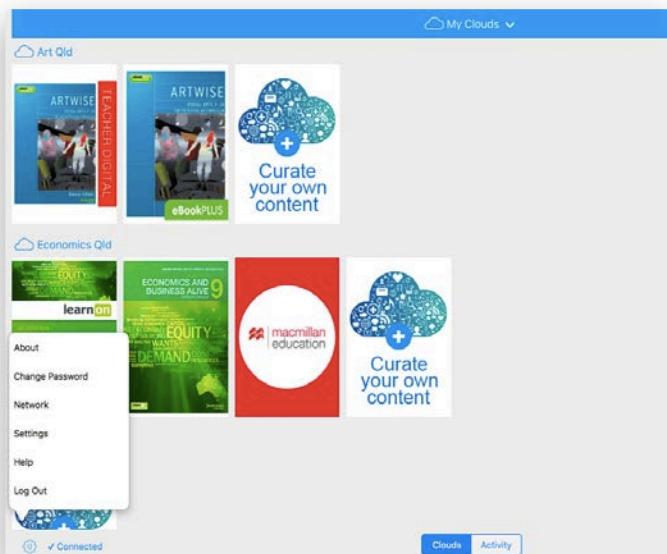

- Displays what version of app you are running.
- Displays the operating system currently running on your device.
- Indicates what user you are logged in as.
- Check for updates – both the ReadCloud eReader and the Content Manager have inbuilt software update functionality. Each time you login the software now checks if any components require updating and if so, we ship these remotely to you. Alternatively, you can check for updates yourself.

Change Password

Allows you to change your password within the app.

Network

When running ReadCloud on a Windows device you can configure the proxy settings. Speak to your network administrator before changing the default settings.

Settings

Personalise your ReadCloud experience by re-ordering ReadCloud's system clouds including the following:

1. My Purchases houses your purchased PDFs and ePubs
2. My Interactive Logins contain your publisher digital interactive thumbnails
3. Local Books include content that you have uploaded from your local hard-drive. It's local content that only you can view
4. You can also hide any empty clouds that have no content assigned to them.
5. Increase or decrease the thumbnail tile size
6. Write events to the log file so that we can understand what's going on behind the scenes a little better

'My Purchases' Cloud position	Normal
'My Interactive Logins' Cloud position	Normal
'Local Books' Cloud position	Normal
Hide empty clouds	No
Write events to the log file	No

Help

Opens an external browser, taking you to ReadCloud Support. Here you will find our FAQ, user guides and video tutorials. You can also access this by heading to help.readcloud.com.

Log out

Click yes if you want to logout. However, it is best to remain logged in at all times

Your Bookshelf

Your bookshelf contains your digital resources for your current school year. There are three system clouds: My Purchases, My Interactive Logins and Local Books. These are together with your Class Clouds, which are in alphabetical order.

My Purchases

Macmillan English
Oxford CHEMISTRY
JACARANDA MATHEMATICS QUEST 12 UNITS 3&4
Oxford BIOLOGY
Macmillan English
Oxford CHEMISTRY
JACARANDA MATHEMATICS QUEST 12 UNITS 3&4
Oxford BIOLOGY

My Interactive Logins

JACARANDA MATHS QUEST GENERAL 12 UNITS 3&4
JACARANDA Science Quest 9
JACARANDA Science Quest 7
JACARANDA Science Quest 10
Mat

Local Books

Add book

Connected

My Purchases

Contains your static digital content - these are eBooks that can be in either PDF or ePUB format.

My Interactive Logins

This is where your publisher digital interactive content is housed. Simply click on any publisher thumbnail to access their digital resources from inside the application. Continual access to this cloud requires an active internet connection.

Local Books

ReadCloud's third system cloud is Local Books, enabling you to upload, open and read PDFs that are stored locally on your device. Local Books allows you to use ReadCloud as an eReader for any PDF. These are resources that only you see and have access to.

Upload by:

1. Locate your Local Books cloud
2. Click on the "Add Book" thumbnail
3. Browse your local drive and select the title you want to upload. On OSX, select 'Open'. On Windows devices, enter a title and select 'Save'.

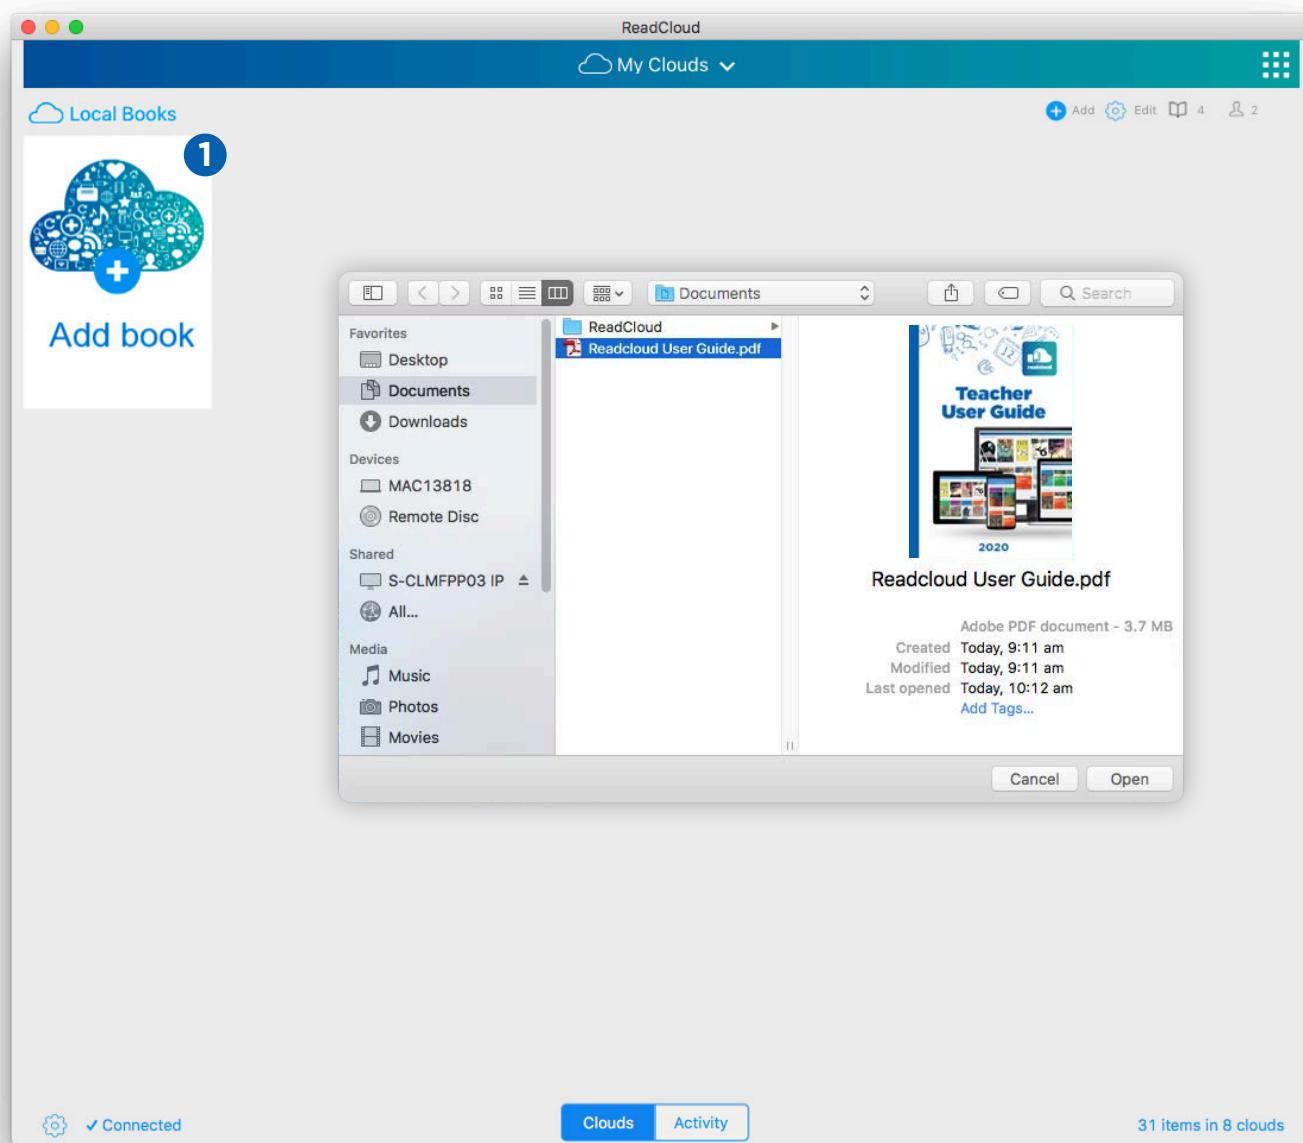

1 Click on "Add book" to upload.

Adherence to Copyright

Copyright compliance is a core value at ReadCloud.

That's why when you upload material onto the ReadCloud platform we ask you to confirm that you have the rights to the content that you are about to upload. At all times, please abide by and respect the author's work and all copyright terms of any third-party publisher.

If at any time you believe you have uploaded any content that may violate or infringe someone's copyright, we ask that you immediately notify us so that the content can be promptly removed.

Your virtual Class Clouds

ReadCloud enables collaboration with your students through its virtual classrooms, called “clouds”. Each class has its own cloud, which is only accessible to the teacher and students of the corresponding physical class.

Collaboration can be in the form of:

- Marking up and annotating parts of an eBook.
- Inserting a rich media file – for example a YouTube video and Kahn Academy talk directly into either the eBook or the Bookshelf and commencing a discussion about it.
- Using Enhanced Annotations insert emojis, tables, images, highlight shapes and freehand drawings on top of an eBook.
- Other resources or notes which may supplement your class content.

All members of a physical classroom access the digital content (eBooks and Publisher Interactive Content) through their Class Cloud.

For example, a year 9 student might be enrolled in five physical classes (Maths, Science, Humanities, English and Geography). That same year 9 student would then be in five virtual Class Clouds – Maths, Science, Humanities, English and a Geography cloud. The naming conventions of each cloud corresponds to the naming convention of each physical class. For example, 9MAT 1, 9SCI 1, 9HUM 1, 9ENG 1 and 9GEO 1.

Downloading eBooks

Download eBooks from either My Purchases or from your virtual Class Cloud.

To download the eBooks, simply click on the thumbnail.

The eBook will begin to download.

A progress wheel appears, indicating the download status.

Once downloaded, your eBook will open to the front cover. The content is now stored locally on your device, enabling offline access.

The screenshot shows the ReadCloud application interface. At the top, there's a blue header bar with the 'ReadCloud' logo, a 'My Clouds' dropdown menu, and various user icons. Below the header, there are two sections: 'English Qld' and 'Geography Qld', each containing several eBook thumbnails. In the center, a modal window is displayed, indicating the download process: 'Downloading from api.readcloud.com' with a circular progress indicator and a 'Cancel' button. The bottom of the screen features a navigation bar with icons for 'Connected' (with a checkmark), 'Clouds' (selected), 'Activity', and 'Qld Demo'.

Navigating through an eBook

Click or tap anywhere on any page once the eBook has opened and a header and footer will appear. Tap anywhere on the page again to make it disappear.

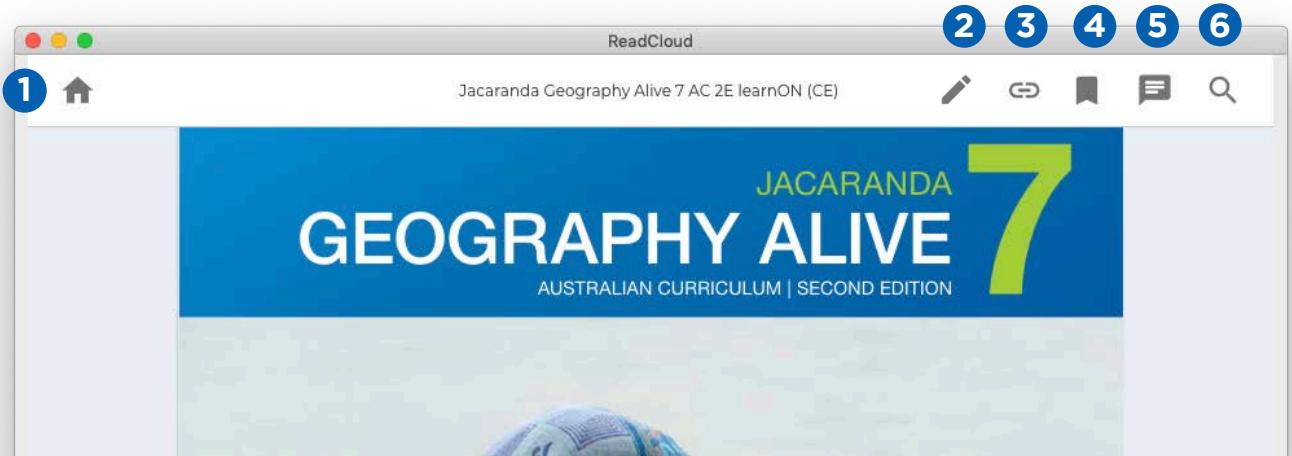

Note that for mobile, the header features need to be accessed by tapping the three dots in the top right of the screen. The reading screen can also be viewed in either portrait or landscape.

In the Header you can access:

- 1 **Home** - exit the eBook by clicking on the Home icon which is located in the top left corner of the header.
- 2 **Enhanced Annotations** - add advanced annotations to a PDF with freehand drawings, shape highlighting tools, embedding images and videos, and using tables, special characters and emojis with the rich text editor.
- 3 **Page Launcher** - this can assist with your session planning and curriculum mapping. Insert into an LMS, OneNote, a document or a calendar invite by:
 1. Clicking on the paperclip. ReadCloud will copy the link to the clipboard on your device
 2. Paste the link into your chosen application
 3. Share this hyperlink with students where appropriate, directing them to a specific eBook or page.

Please note this feature is only turned on for teachers.
- 4 **Bookmark** - view your bookmarked pages and make a new one.
- 5 **ReadCloud's Learning Annotation Thread** - review comments made by your students. Each annotation shows the context of the eBook it was made with, as well as date and time stamped, so when you respond you will see the previous discussion thread.

Teachers are able to edit or delete students' comments and students cannot edit or delete their own annotations once published, unless they are private.
- 6 **Search** - use the search function to navigate by key word or term, the number of search results will appear on the right, as well as arrows to navigate between them within the eBook.

Navigating through an eBook

Annotations Filter

When in an eBook, select the Annotations Thread in the Header to manage class conversations and your private annotations.

The Filter tool, located in the top right, provides three options that determine what annotations are visible in your eBook:

- All Annotations - both your private notes and all shared Class Cloud annotations are visible.
- My Annotations - only your own private annotations can be seen.
- No Annotations - read the eBook as-is, with no annotations, even your own, visible. You also cannot make new annotations when this mode is selected.

If you try to make an annotation with the 'No Annotations' filter on, a dialogue box will ask if you want to change the filter to 'All Annotations'.

The screenshot shows a portion of an eBook page from 'Civics & Citizenship Alive 7 learnON (EC)'. The page content discusses the separation of powers between state governments and the federal government. A red callout box contains three numbered questions. At the bottom of the page, there is a 'Resources' section with a green button labeled 'Try out this interactivity: Searchlight ID: int-5311'.

On the right side of the screen, a floating window titled 'Annotations' is open. It has a dropdown menu with three options: 'All Annotations' (selected), 'My Annotations', and 'No Annotations'. Below the menu, it shows a list of annotations from 'Qld Demo' on 'Page 12'. One annotation is visible: 'king a constitution less clear than we would'. At the bottom of the annotations window, there are icons for a magnifying glass, a person, a speech bubble, a pencil, and a trash bin.

At the very bottom of the screenshot, another list of annotations from 'Qld Demo' on 'Page 85' is partially visible, showing one annotation from a month ago.

Navigating through an eBook

Click on the icon located in the right-hand corner of the footer to access the table of contents. The table of contents will open as a floating menu over the current page, allowing for quick navigation. Simply scroll through then click on your desired chapter or sub-chapter.

Use the magnifying glass icons to zoom in or out of the eBook, or the drop down menu to select a specific magnification.

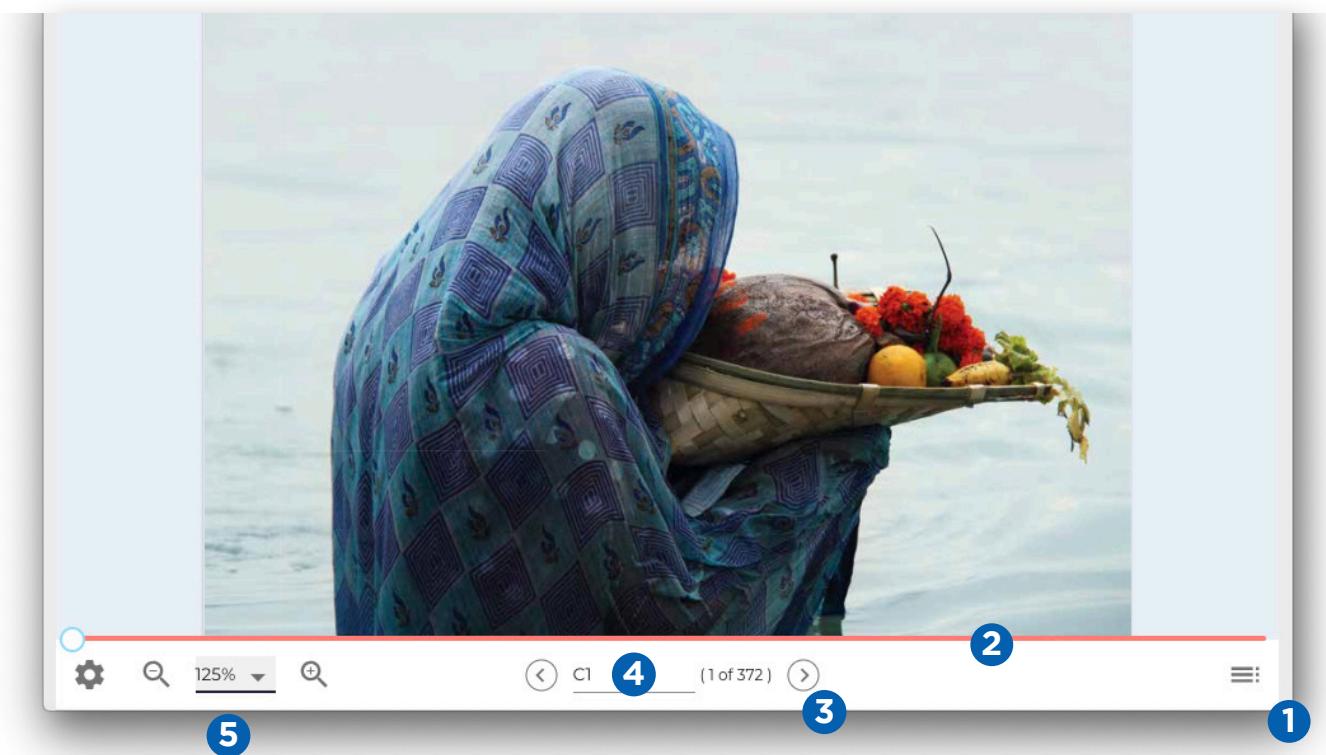

The ReadCloud eReader offers a variety of tools to quickly, easily and accurately navigate through an eBook.

- For quick and imprecise navigation, click, hold and drag the scroller along the slider bar.
- You can also enter your desired page number into the textbox located below the page slider in the footer of the Reader to navigate to your specific page.

- To scroll between adjacent pages you can:
 - Click on the arrows located in the footer on either side of the page number textbox
 - Press and hold the keyboard arrows for a continuous scroll
 - In Windows, select CTRL+ the keyboard arrows to scroll one page at a time
 - Also in Windows, select SHIFT+ the mouse scrolling button for a continuous scroll
 - Use left and right swiping motions on a laptop trackpad
 - If you have a touch screen, swipe or tap on the edges of the page

In the footer you can access:

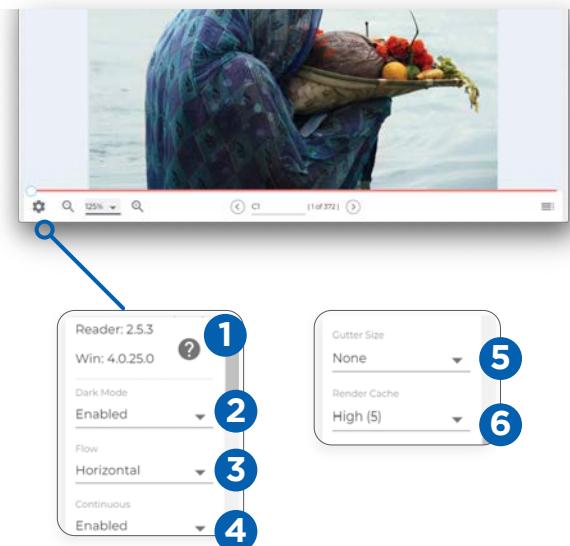

- 1 Table of Contents
- 2 Page Scroller
- 3 Page Arrows
- 4 Page Number Textbox
- 5 Zoom In, Zoom Out (PDFs only)

Navigating through an eBook

Personalise your reading experience. Settings are different for each eBook, depending on whether it's a PDF or ePUB. Click the settings icon in the bottom right hand corner of the footer to access.

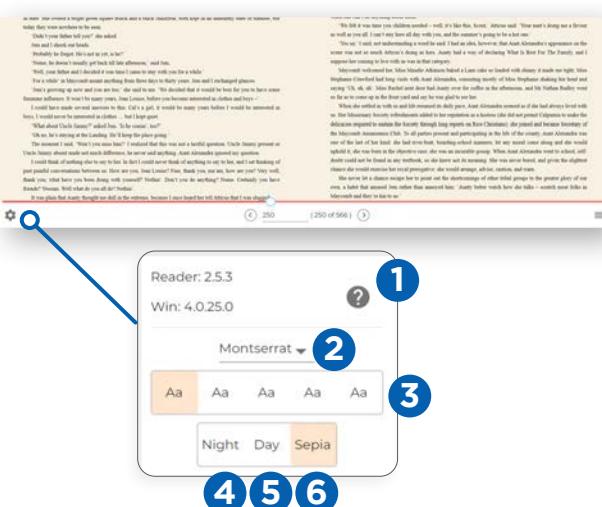

PDF Settings

- 1 Enable walkthrough** - starts an in-app tutorial of the eReader
- 2 Dark mode** - changes the colour behind and between the eBook pages
- 3 Flow** - changes the direction the pages scroll, between horizontal and vertical
- 4 Continuous** - changes the display, be it one page or multiple.
- 5 Gutter Size** - only activated once 'Continuous' is enabled. Changes the size of the space between pages.
- 6 Render Cache** - dictates how many pages on either side of the displayed page your device loads in the background. If your device is slow, we recommend setting it to Minimum (1).

In both PDFs and ePubs, you can also check the reader version, if support is needed.

ePub Settings

- 1 Enable walkthrough** - starts an in-app tutorial of the eReader
- 2 Font family** - select a different type of font
- 3 Font size** - change the size of the font
- 4 Day mode** - a white background behind the text
- 5 Night mode** - inverts the text and provides a back-lit experience
- 6 Sepia mode** - for a more paper-like background

Students with learning difficulties can benefit from ReadCloud's ePub features - with the font Dyslexie available and the sepia background option helping make reading easier.

Navigating through an eBook

ReadCloud's Learning Toolbar

Bring the text to life with ReadCloud's Learning Toolbar. Highlight a word, a string of words or an entire paragraph and the Learning Toolbar appears.

In the Learning Toolbar you can:

- 1 Add an annotation to the selected text.
- 2 Bookmark a section of the eBook.
- 3 Lookup a selected term in the dictionary. The dictionary function only appears when a word or phrase is highlighted.
- 4 Copy to clipboard if allowed.
- 5 Text-to-Speech reads aloud the selected text.

The screenshot shows a computer screen displaying a digital textbook titled "Jacaranda Geography Alive 7 AC 2E learnON (CE)". The main content area is titled "TOPIC 1 The world of Geography". Below this, a sub-section is titled "1.1 Overview". A heading "1.1.1 What is Geography?" is followed by text explaining that geography is about exploring, analysing and understanding the world around us. The text highlights that geography involves studying people and places, and aims to build knowledge and understanding of our planet at different scales: local, national, regional, and global. It also mentions the relationship between people and places. At the bottom of this section, there is a callout box with the text: "FIGURE 1 Our planet is made up of a large variety of fascinating places, peoples, cultures and environments." Below the text is a large image of a globe composed of numerous small photographs showing various global landscapes and cultures. The bottom of the screen shows standard eBook navigation controls: a gear icon, a magnifying glass, a zoom slider set to 100%, a search bar, a page number indicator (1), a page range indicator (17 of 372), a right arrow, and a three-dot menu icon.

ReadCloud's Learning Toolbar: Annotations

The toolbar has several icons: a magnifying glass, a pencil, a speech bubble, a person icon, a cloud icon, a gear icon, and a refresh icon.

Geographers

Note
An annotation

2 Private

CANCEL ADD

- 1 Using the Add Annotation button, you can engage in a discussion with your class or selected class members. Annotate and collaborate with your virtual class or keep a private digital note for yourself. Additionally, you can simply highlight text without adding an annotation: select the text you wish to highlight and choose a colour.
- 2 Having the toggle setting marked to private allows you to keep a private note for yourself.
- 3 By clicking the eye toggle, the shared setting is activated, allowing your entire Class Cloud to see your thought, comment or question. Simply click 'Post' when you are ready to share.
- 4 Share with entire Class Clouds. If you use the same book across multiple classes, you can share your thought, comment or feedback once and select the classes that can see it. Those class members can then engage in a closed class discussion.
- 5 Share with specific individual students.

Communicate one-to-one, one-to-many and one-to-all. Both teachers and students have access to each other's comments in the annotation thread. However, only teachers can edit and delete comments.

Numerous videos and interactivities are embedded just where you need them, at the point of learning, in your learnON title at www.jacplus.com.au. They will help you to learn the content and concepts covered in this topic.

The world around us is made up of a large range of interesting places, people, cultures and environments. Geography is a way of exploring, analysing and understanding this world of ours; especially its people and places. Studying Geography helps us to understand our planet, at different scales, and to investigate the characteristics of different places.

1.1.2 Geography is

Have you ever visited a place? ...

As a geographer, you answer questions ranging from the local to the global, in the past, present and future. Along the way you will develop skills and inquiry methods to answer these questions for yourself.

CANCEL ADD

Enhanced Annotations

Available for eBooks in PDF format, enhanced annotations bring the text to life in many more ways.

Share hand-drawn notes, shapes as well as embed videos, images and HTML or rich annotations with your Class Cloud to supplement and enhance learning outcomes.

Find a record of all your annotations in the Annotations Thread in the eReader Header. This feature is turned off for students by default.

- 1 Select** - move, edit and share each enhanced annotation with one or multiple of your Class Clouds or students. If the 'Save as Preference' button is visible, you can change the default look of the annotation.
- 2 Pen** - allows you to freehand draw on top of your eBook using a mouse, stylus or your finger.
- 3 Circle Highlight Tool** - click and drag to create a circle highlight shape and change the colour, opacity and border.
- 4 Square Highlight Tool** - click and drag to create a square highlight shape and change the colour, opacity and border.
- 5 Simple Text Editor** - click and drag to create a text box; change the font, size, colour, alignment and opacity.
- 6 Video** - embed a video into an eBook. Click and drag to create a frame and select a video from either your personalContent Manager or a URL.
- 7 Image** - embed an image in a similar way; select from a URL or your Content Manager and adjust the placement and size.
- 8 Rich Text Editor** - similar to the Simple Text Editor, this feature allows you to add everything from images and videos, tables, special characters, emojis and even HTML.

1.2 Key features of Australia's system of government

1.2.1 Australia's system of government

Before **federation**, Australia consisted of six colonies: New South Wales, Queensland, South Australia, Tasmania, Victoria and Western Australia. Each colony had its own government and the power to make laws under the control of the British monarch. During the late 1880s and 1890s, there was increasing support for the idea of the six self-governing colonies joining together to become one united nation. The Commonwealth of Australia was formed on 1 January 1901. The colonies — now called states — agreed to keep some of their law-making powers and hand over others to the new Commonwealth Parliament.

FIGURE 1 Parliament House in Canberra, the home of the Commonwealth Parliament

FIGURE 2 Australia's federal parliament consists of the Crown (the Queen or the Queen's representative, the Governor-General), the upper house (the Senate), and the lower house (the House of Representatives).

Accessing and Navigating Publisher Interactive Content

It's easy to see which tiles are Interactive Publisher Content: they are all housed in the My Interactive Logins cloud together with the relevant Class Cloud, and the thumbnail image will have the Publisher's interactive platform name or logo.

Simply click on a publisher interactive thumbnail tile to open the content.

Once selected, there are three ways to log in:

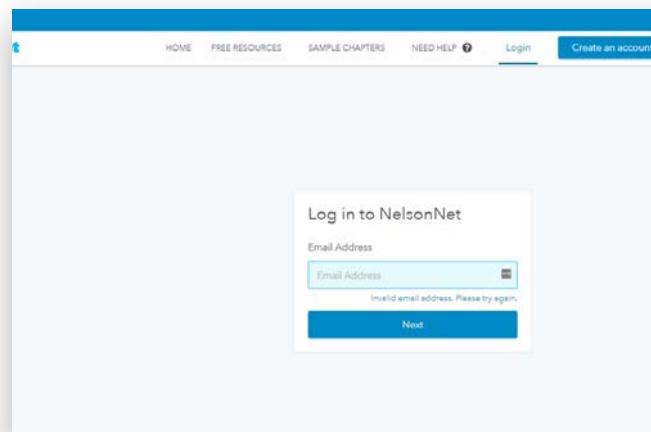

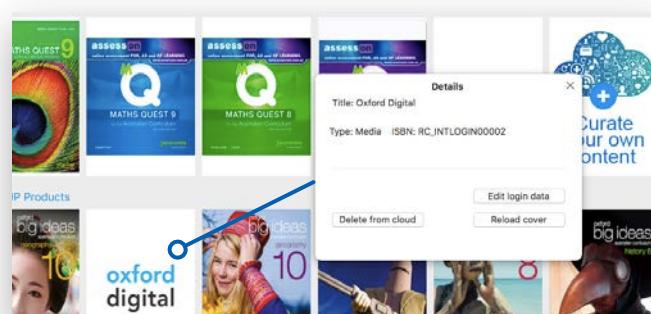

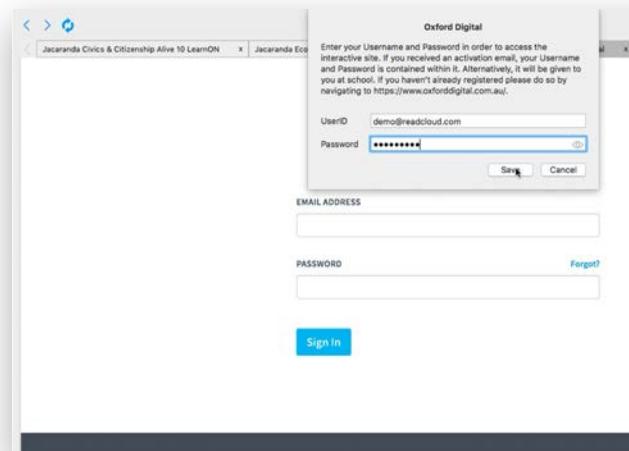

1. If the publisher has integrated with ReadCloud, you can log directly into their interactive platform, without the need to enter a further username and password.
2. ReadCloud will fire up an in-app browser and take you to the publisher's login page. A dialogue box will appear on top of the page; enter your login credentials in this box, which will be provided to you at school. You only need to enter these once - ReadCloud remembers them and logs you back in each time.

You can also right click or long hold on any Interactive Tile and select 'edit login data' to update your password if needed.

3. ReadCloud will fire up an external browser, taking you to the publisher's website. Enter your publisher login details directly into their login page. Remember to save your credentials in the browser in order to return without the need to re-enter them

ReadCloud's Interactive Bookshelf Tab

When you open an interactive tile, a third tab appears at the bottom of your Bookshelf next to 'Clouds' and 'Acivity', called 'Interactive'. Easily access your open interactive digital resources by either clicking on an interactive thumbnail or on the interactive Bookshelf tab.

To return back to your Bookshelf from the in-app browser view, click on the large X which is located on the top right-hand corner of the in-app browser window.

Exporting Annotations

A more advanced feature of the Bookshelf allows you to export your text-based annotations.

Export by:

1. Choosing the title
2. Right clicking on the thumbnail
3. Click more
4. Select Export Annotations

The screenshot shows the ReadCloud web application interface. At the top, there's a blue header bar with the 'My Clouds' dropdown and various user icons. Below the header, there are two main sections: 'Geography Cloud' and 'History Cloud'. In the 'Geography Cloud' section, a thumbnail for 'GEOGRAPHY ALIVE 10' is selected, and a context menu is open over it. The menu has a 'Details' section containing the book's title, type (PDF ISBN: RC_JAC00007), and download status (Downloaded: NO). Below this are three options: 'Delete from cloud', 'Reload cover', and 'More...'. A 'Cancel' button is at the bottom right of the menu. The background shows other book thumbnails like 'Student User Guide' and 'HISTORY ALIVE 10'. At the bottom of the screen, there are navigation tabs for 'Clouds' and 'Activity', along with a 'Connected' status indicator and a 'Demo Account' link.

The screenshot shows the 'Annotations Export' page from the ReadCloud admin interface. At the top, there are navigation icons (back, forward, search) and a URL bar with the address <https://admin.readcloud.com/app/#!/main/actions/exportAnnotations?bookId=5a55146fed502d4043151889&cloudId=5aa5faf8e4b0>. Below the header, the title 'Annotations Export' is followed by the date '2019-03-22 16:52'. On the right, there are 'Print Preview' and download icons.

The main area has three sections:

- View Mode:** Set to 'List' with a limit of 20. There are also 'Private Only' and 'Only made by you' filters.
- Total:** 10 annotations.
- Annotations:** A list of 10 entries, each with a timestamp, a brief description, and a 'Page' number.
 - Qld Demo** (2019-02-26 at 12:44 PM) - Page 229: 6.7 Activities, Complete by Tuesday.
 - Qld Demo** (2019-02-26 at 12:44 PM) - Page 225: GhostNets Australia, Write assignment by Friday.
 - Qld Demo** (2019-02-26 at 12:43 PM) - Page 222: The Surfrider Foundation in Australi, Look this up tonight.

5. Decide on which annotations to export – those that are private, those that are shared and those that are shared but only made by you
6. Choose between:

List view

This screenshot shows the same 'Annotations Export' page as above, but with the 'View Mode' set to 'List'. The annotations are displayed in a list format with columns for 'Page', 'Date', and 'Annotated Text'.

Page	Date	Annotated Text
0	2019-02-26 12:44	6.7 Activities
0	2019-02-26 12:44	GhostNets Australia
0	2019-02-26 12:43	The Surfrider Foundation in Australi
0	2019-02-26 12:43	Close to 80 per cent of mai
0	2019-01-07 17:13	asylum seekers

62	2018-08-21 15:57	Numerous videos and inter

Table view

This screenshot shows the 'Annotations Export' page with the 'View Mode' set to 'Table'. The annotations are presented in a tabular format with columns for 'Page', 'Date', and 'Annotated Text'.

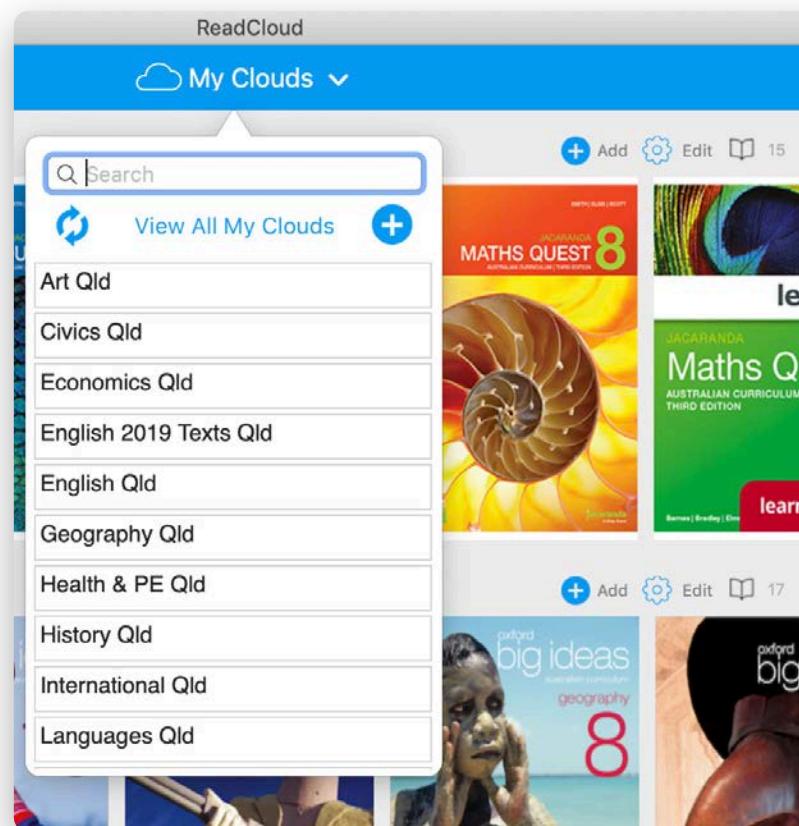

Page	Date	Annotated Text
0	2019-02-26 12:44	6.7 Activities
0	2019-02-26 12:44	GhostNets Australia
0	2019-02-26 12:43	The Surfrider Foundation in Australi
0	2019-02-26 12:43	Close to 80 per cent of mai
0	2019-01-07 17:13	asylum seekers
62	2018-08-21 15:58	Land is one of our most val
62	2018-08-21 15:57	Numerous videos and inter

7. Limit the number of annotations per page, with 100 being the maximum.
8. Download a CSV file. This will include which page the annotation was made on, the date of the annotation, which part of the text was annotated and the annotation text.
9. Print the annotation

Please note that the corresponding eBook text that has been highlighted cannot be exported alongside your annotations.

Adding a Classroom Cloud to your Bookshelf

As teachers, you have the ability to add more Clouds to your Bookshelf. Click the '+' button in the top drop down menu in the Bookshelf and enter a title, description and members - both students and other teachers. You can also check the box which determines whether those members can add media via the Content Manager.

The screenshot shows the 'My Clouds' dropdown menu open, displaying a list of existing classroom clouds. Below the menu, a modal window is open for creating a new cloud. The modal has the following fields:

- Title:** Maths Qld
- Description:** (empty)
- Members:** (empty)
- Admins:** (empty)
- Remove:** (button)

At the bottom of the modal, there is a checked checkbox labeled "Members can add media". Below the modal, there are "Save" and "Cancel" buttons. The background of the interface shows a grid of book covers, including "JACARANDA Maths Qld" and "oxford big ideas geography 8".

ReadCloud's Content Manager

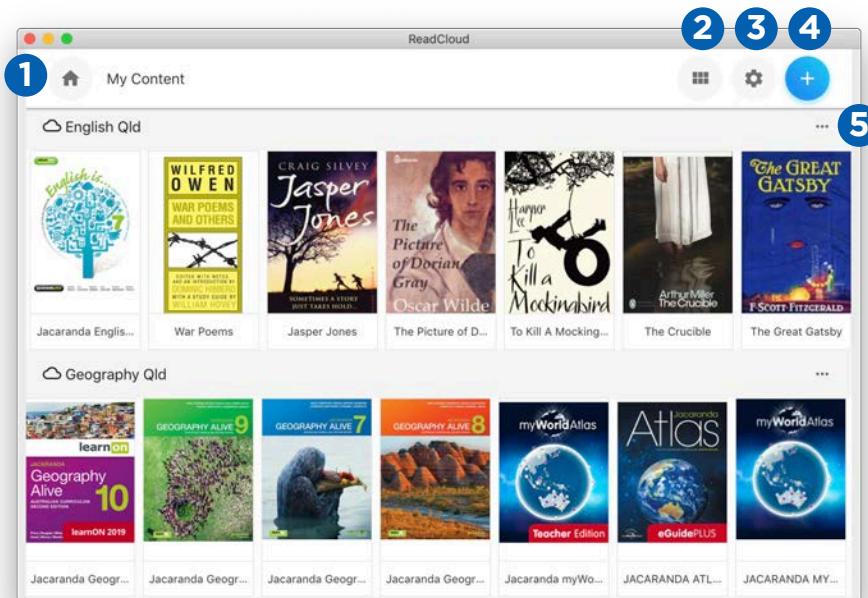

The Content Manager mirrors the Bookshelf layout.

Our Content Manager gives you as teachers the power to curate your own content over and above the commercial curriculum by uploading resources to each of your virtual Class Clouds, to better contextualise, enhance and supplement your students' learning experience.

Resources can be in the form of a PDF, ePub, audio file, video file, image or weblink. These resources will remain in your ReadCloud account year-on-year and are independent of the curriculum content and your Class Clouds.

Enter the content manager by clicking on the "Curate Your Own Content" thumbnail. This is hard coded at the end of each Class Cloud.

This feature is turned off for students, but it can be turned on.

Once inside the Content Manager you will be able to:

- 1 Head back to the Bookshelf
- 2 Toggle the display mode
- 3 Assign tags to content and Class Clouds
- 4 Add content
- 5 Re-order content in that Cloud to match your session planning.

ReadCloud's Content Manager

Adding Resources

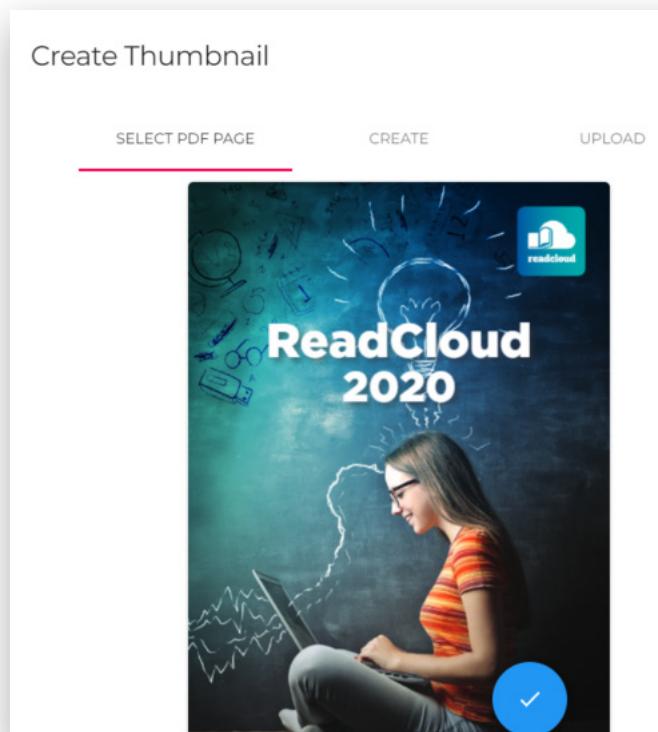

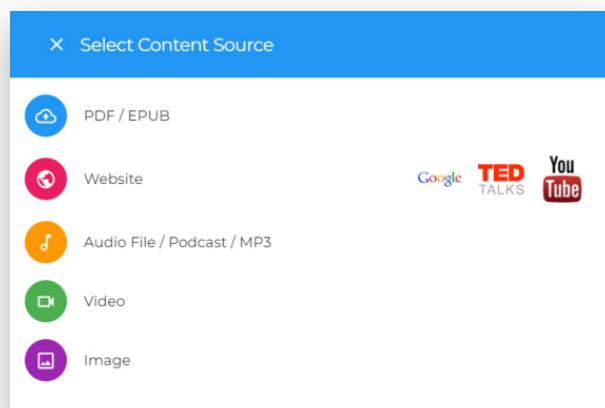

Once in the Content Manager, adding tailored resources to your Class Clouds is a straightforward process.

1. Click on the blue '+' found on the top right of the screen.
2. A new dialogue box opens and prompts you to select the content type you would like to upload. These options include:
 - PDF or ePUB
 - Website link, including from Google, TED Talk or YouTube
 - Audio file, including any MP3 or podcast
 - Video
 - Image
3. Either choose a file from your local device, or if you're uploading a PDF, ePUB or website insert a URL. This option is useful for content your school owns but isn't being provided through ReadCloud.
4. Next select the thumbnail image of your content, which is how it will appear in the Class Cloud. Options include:
 - Uploading an image from your device and pressing 'Select'
 - Creating a text thumbnail by typing in the box labelled 'Thumbnail Text' and selecting 'Save'
 - If you're uploading a PDF, you can select a page within the document to use as a thumbnail. Select the blue arrow to choose the page.
5. Add a title and description, select 'Next'
6. Select which Class Clouds this content will be assigned to - one, many or none at all. You can re-assign content at any time.
7. Next, select a tag, which groups resources

together to make searching and categorising content easy. The content you upload and its tags remain in your personal content manager year-on-year; this means your curated content can easily be added back to each new Class Cloud every school year.

8. Finally and importantly, please review the Terms and Conditions carefully, and ensure that you have the right to upload the content. Accept the Terms and Conditions, and click 'Finish' to upload your content.

At any stage you can go back by clicking on the 'Back' button located on the top left of the dialogue box.

ReadCloud's Content Manager

Managing Resources

Click the icon labelled 'Filter' in the top right corner of the Content Manager to create a tag, search and manage your content.

Tags

Tags or labels are keywords that you can assign to your curated content.

Categorise and label your resources to upload into Class Clouds of relevance.

Tagging gives complete control over your content in ReadCloud.

Organise your resources for future use, interconnect content that may be relevant for one Class Cloud

Tags also give you the flexibility to re-purpose your content year on year independent of your Class Clouds.

Tag by subjects that you teach, topics within each subject – you decide!

If you don't tag your content, it will appear as "Untagged" at the bottom of the Content Manager.

Adding a Tag

1. Click the Filter icon
2. Click the + button which is located to the right of the word Tag
3. Give the new Tag a name
4. Select 'Create'

Search for Content

Search by title or reference in the search bar within the Filter, and the Content Manager will search for your desired file.

Alternatively search tagged, untagged and clouds by selecting the relevant tag or cloud to find the desired content you are after.

Re-Ordering Content

1. In the Content Manager, find the Class Cloud that you want to reorder
2. Click on the three dots, located to the right of the cloud name
3. Select reorder
4. Drag the titles into your desired order
5. Save
6. Return to your Bookshelf to view your re-ordered content.

How to access and edit your curated content

1. Locate your resource in your Class Cloud. Do so by scrolling through your bookshelf (please note clouds are listed in alphabetical order, including ReadCloud's system clouds).
2. Alternatively you can click on the down arrow which is located in the blue header of the bookshelf and select the cloud.
3. Click on the title. It will download in the same way a purchased resource does. Annotations and all of ReadCloud's eReader features are also available in locally curated content.

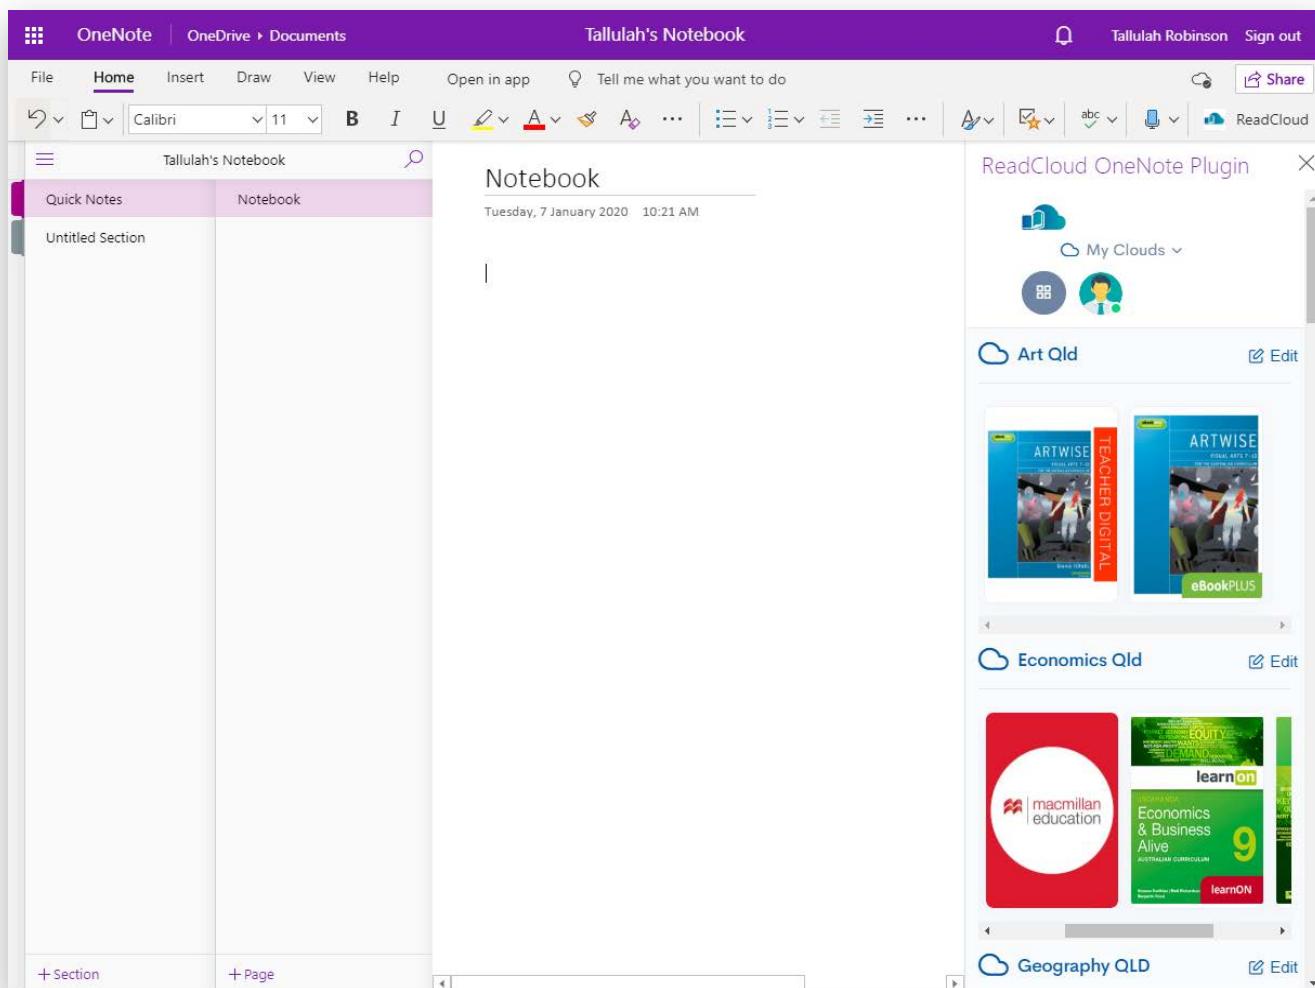

ReadCloud OneNote Plugin

The ReadCloud plugin allows you access to your Bookshelf and all of ReadCloud's features inside the OneNote web app. You can stream your eBooks as well as access your publisher interactive resources without having to leave OneNote.

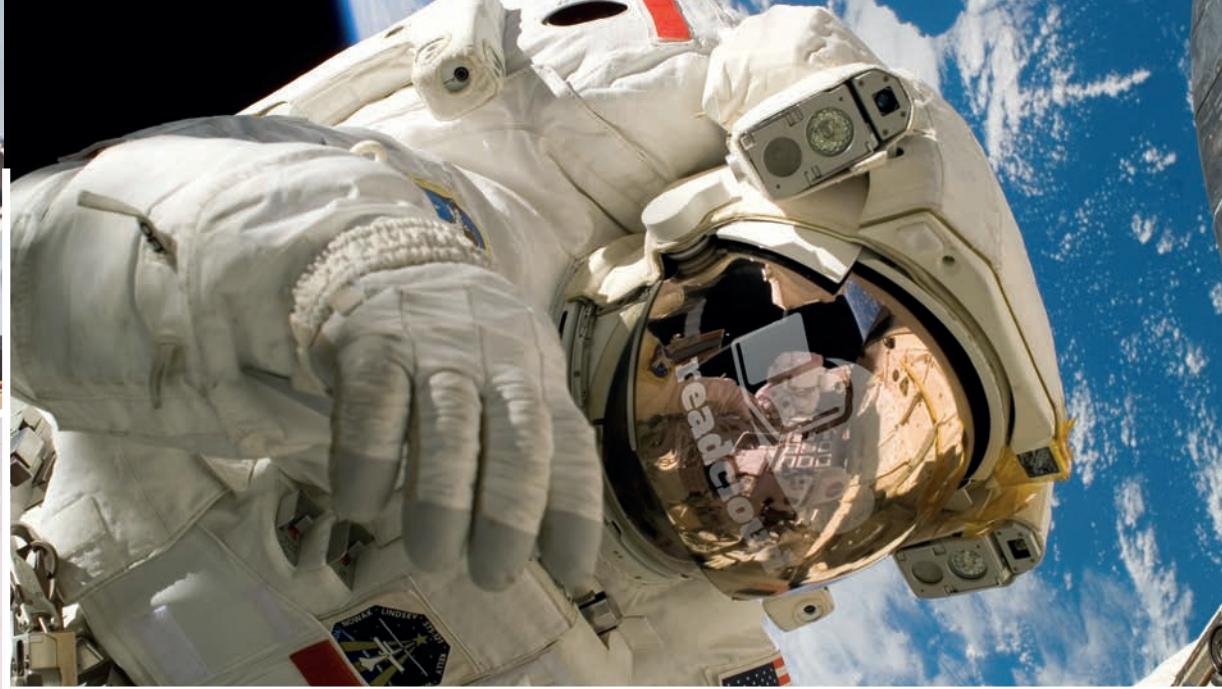

Please remember in order to access this feature you need to be logged into the OneNote, as well as the ReadCloud web app.

1. Download the ReadCloud Installer File and have it on your device. Your teacher or administrator can send it to you or find it on our Support site [here](#).
2. Open any OneNote document.
3. Go to the 'Insert' tab, then 'Office add-ins'.

4. In the dialogue box that opens, select 'Upload my add in' at the top right corner.
5. In the next box select 'Browse' and find the ReadCloud Installer File on your device.
6. Then select upload.
7. You'll then be taken back to your open document; head to the Home tab and you'll find the ReadCloud plugin at the far right.
8. Select it and you'll find a sidebar opens with all the ReadCloud functionality right there in your app, ready for you to use both platforms in the same place.

The screenshot shows the OneNote web interface with a purple header. The title bar reads "OneNote | OneDrive > Documents" and the page title is "Tallulah's Notebook". The ribbon tabs include File, Home, Insert, Draw, View, Help, and Open in app. The Home tab is selected. The ribbon tools include font (Calibri), size (11), bold (B), italic (I), underline (U), and various drawing and text styles. A search bar says "Tell me what you want to do". The main content area is titled "Notebook" and shows the date "Tuesday, 7 January 2020 10:21 AM". Below the ribbon, there are sections for "Quick Notes" and "Untitled Section". On the right side, a sidebar titled "ReadCloud OneNote Plugin" is open, showing a list of cloud storage options ("My Clouds") and four categories of books: "Art Qld", "Economics Qld", "Geography QLD", and "Macmillan Education". Each category displays thumbnail images of the eBooks available.
